Psychoanalytic Psychotherapy

Sigmund Freud noted a number of ego defenses which were noted throughout his work. Their research tends to be highly empirical and is often centered round lab experiments.

Social Psychology: Definition, History, Methods, Applications

The client says whatever first comes to mind when the therapist says a word. It is quite possible that aggressive children choose to watch more violent TV programs.

Cognitive and Affective Processes

It was also, apparently, foreign to the doctors who treated their depression previously, because no one even raised it as a possibility see my blog post for more discussion.
