The remaining areas examined in detail were found to lack wilderness characteristics for a variety of reasons.

## **Western Oregon**

The Commission's District Plans were finalised in March 2018 after extensive stakeholder and community consultation, including. This manual provides a process for identifying BLM lands that meet the following criteria: a encompass at least 5,000 acres of roadless, contiguous BLM lands ; b appear to be in a natural condition; c provide outstanding opportunities for solitude or primitive and unconfined recreation. The screening was performed using Geographic Information System GIS data with the following parameters: 1 Spatial identification of

These 20-year plans are a bridge between regional and local planning. In conducting these inventories, the western Oregon districts followed the guidance provided in BLM Manual 6310—Conducting Wilderness Characteristics Inventory on BLM Lands.

## Western Oregon

In conducting this inventory update, the BLM performed an initial screening to identify all areas that could potentially meet the minimum size criteria. As inventory maintenance, the BLM used the same criteria from Section 2 c of the Wilderness Act to determine the presence or absence of wilderness characteristics.
