### **Humphry Davy and the murder lamp: Max Adams investigates the truth behind the introduction of a key invention of the early Industrial Revolution.**

This inducted him in the faculty of the Royal Institution as a lecturer. A founder member of the Geological Society and co-founder with Sir Stamford Raffles of London Zoo, Davy was also a poet of some ability, enjoying the respect and lively friendship of Southey, Coleridge, and Wordsworth among others. While generally acknowledged as being faithful to his wife, their relationship was stormy, and in his later years Davy travelled to continental Europe alone.

#### **Item Display**

During this time, his meddling attitude helped him in discovering the anesthetic effect of nitrous oxide.

#### **Humphry Davy: Laughing Gas, Literature and the Lamp**

She died in 1749, a few days after giving birth to her daughter. His father died in 1794.

#### **Sir Humphry Davy**

While in Paris, Davy was asked by to investigate a mysterious substance isolated by. He also discovered by heating borax with potassium, hydrogen telluride, and phosphine.

#### **Davy lamp**

Lie was in Paris at the outbreak of the French-German war of 1870. England continued to use 25 Mar as the beginning of the new year for official purposes until 1752, and made the change to using 1 Jan at the same time as the adoption of the Gregorian calendar. This was the time he was investigating about the theory of volcanic eruption.

#### **Sir Humphry Davy**

The speed record never became official because the average of two runs is required, and the car never ran again.
