### The Daily Apologist

The book then went on to discuss how to answer challenges to the position. But morally, the issue is not complex at all. The first part of the book presents the prolife argument very well, beginning with the need of clarifying the debate by focusing on what the issue really is about, and then asking what is the unborn, whether human beings are valuable, etc.

The author also displayed considerable philosophical ignorance when he suggests that if one believes in God they must also be a platonic dualist. Morality, like choosing your favorite flavor of ice cream, is strictly a matter of personal preference.

Furthermore, high infant mortality rates in some countries do not justify infanticide. If they truly believe that, we need only use science to show the unborn is a human being and their belief about equality should compel them to accept the pro-life view.

There is no neutral ground. The very considerable semantic gymnastics which are required to rationalize abortion as anything but taking a human life would be ludicrous if they were not often put forth under socially impeccable auspices. How do you think we should treat each of them? If you deny this, it's difficult to account for fundamental human equality for anyone.

The abortion controversy is about who we may intentionally kill. Black jags are almost never photographed, but you got it! After recovery, you

return to work and encounter the flight of stairs—the same flight of stairs you earlier avoided. Put differently, justification is a matter of imputation: My guilt is imputed to Christ; His righteousness is imputed to me.

### **The Daily Apologist**

A Philosophical Question: Human Non-Persons? As a substance develops, it does not become more of its kind but matures according to its kind. Put simply, how does it refute my essential pro-life argument? A useful heuristic is, whenever we hear an argument for elective abortion to stop and ask this question: Would this justification for killing the unborn work for killing a toddler? This highly specialized, totipotent cell marks the beginning of each of us as a unique individual. What results is more compilation than original research.

### **The Case for Life: Equipping Christians to Engage the Culture Faithlife Ebooks**

The Case for Life provides intellectual grounding for the pro-life convictions that most evangelicals hold. Malcom Potts argued this way during our U. Put simply, Bailey would have us believe that there is no difference in kind between a human embryo and each of our individual cells.
