. The eccentric cutting frame is indeed especially convenient for many forms of pierced work and in tinting for the separation of straight and curved foliated work, inasmuch as the radius given to the tool may be that which will effect the removal of the precise width of material for any given spaces or intervals, or when that quantity is doubtful, or the interval has to meet or to merge into some other cutting already existing, the radius may be increased little by little so as by trial cuts gradually and certainly to arrive at it. Pallet Wood Planter Box 37.

## Gardening

This civilization left an impressive artistic legacy of sandstone sculptures, both in the round and in relief. Yet, granted the will, and though the way lies ready to us, we must not be discouraged if the journey seem barren enough at first, nay, not even if things seem to grow worse for a while: for it is natural enough that the very evil which has forced on the beginning of reform should look uglier, while on the one hand life and wisdom are building up the new, and on the other folly and deadness are hugging the old to them. Integrating literacy and technology in the curriculum: A position statement.

## 10 Practical Approaches to Teaching

The basket-work to the left of the upper cylinder fig.

## Strike a pose: 250 years of life drawing at the RA

In this a round stem clamped in the slide, passed through and was secured to a rectangular fork which carried the spindle, and the latter was set in motion by THE UNIVERSAL CUTTING 1'HAMF. Then boil in water for thirty minutes, and place in an oven as hot as they will bear without burning, until quite dry.

**The Project Gutenberg eBook of Art of Hair Work, by Mark Campbell.**

Some of the figures are full size, some half size; when dimensions are given they refer to the instrument above named With the casting, which carries the bearings of the spindle fixed on the top of the slide-rest, all the requirements of a driller are attained.

**William Morris**

The formation of parallel prisms in the lathe for ornamental turning, it will have been gathered, requires that the material turned cylindrical, be arrested at the four, six or other equi-distant positions according to the number of sides, whilst the tool in the eccentric cutting frame or a bent cutter fig.
