[PDF] Impact of organisational change on mental health: a systematic review

Another concern was the amount of time it took staff and managers to complete the survey assessments due to their length. Organizations characterized by a past orientation and perceiving themselves as replete when in reality they lack in the required competencies may exist in the unreality dimension. Perceived utility of LOCI was assessed with questions assessing the degree to which the overall experience was useful.

Nor is role modeling limited to individuals. It fails to realize that a new competitor may move in and change the face of the market itself with some innovative product or service.

The 10 steps for facilitating a mental model change

The results of this study suggest that LOCI may be a viable strategy to support organizations in preparing for the implementation and sustainment of EBP.
