Domestic Hot Water Service Systems

If you follow the advice you will be doing enough to comply with the law in respect of those specific matters on which the Code gives advice. Avoid installing mixer taps, which waste hot water unless they are very carefully used.

Chlorination of Water Systems, Mains Water Pipework, Water Tanks

It also refers to other control methods e. Regulations 6, 7, 8, 9 and 12 are particularly relevant to Legionella control. Starting dates for extension of the phase-out to existing homes depend on decisions by individual jurisdictions.

Legionella Control

Installing a water efficient at least 3 star showerhead can reduce this use by about half. It is open when the ball's hole is in line with the flow and closed when it is pivoted 90-degrees by the valve handle. Risk management 10 Guidance on risk assessment and control measures can be found in.

HTM 2027 Hot and cold water supply, storage and mains services. Design considerations, NHS Estates

Overall, the effectiveness of water supply system means a decision may be taken by examining a method of distribution the water supply to the premises in an orderly manner and properly. Consider installing a high efficiency continuous flow water heater if your hot water needs are small, or intermittent.

Guidance

Gravity mesh screen versions are used in gravity systems, and can remove suspended particles as small as 150 microns. Heat pump systems do not require flushing.

Chlorination of Water Systems, Mains Water Pipework, Water Tanks

Large electric storage tanks and their fittings can waste up to 1,000kWh each year; a typical 5 star gas storage HWS wastes 3,500MJ. Modulating a large power supply may create unacceptable temperature variations - especially sensible in showers.

HTM 2027 Hot and cold water supply, storage and mains services. Design considerations, NHS Estates

An efficient hot water service HWS can also add value to your home and help meet state, territory or local government regulations. These are the least expensive alternative, but offer relatively little protection from UV sunlight that can affect the quality of stored water. Ongoing cost and environmental benefits of solar or heat pump hot water units may be more attractive.

HTM 2027 Hot and cold water supply, storage and mains services. Design considerations, NHS Estates

Discharge in branching pipes for sanitary fitting are transferred into single stack pipe. The Rainwater Connection offers Owner's Manuals, 1st year monitoring of system, and annual maintenance contracts.
