### Forest Animals

Scattered through other areas are the , , wild, , , beaver, and numerous other small animals.

### List of nature deities

Compared to ground kangaroos, tree-kangaroos have larger tails, broader and longer hind feet, and special gripping paws that have a sponge-like texture.

### Rainforest Animals List With Pictures & Facts, Free Printable Worksheet

These birds live in small family groups of an adult pair and a few immature birds. Several of these, including the hyacinth macaw, great green macaw and scarlet macaw, are found in rainforests.

### Animals of the Forest

Scarlet macaws have bright red feathers mixed with yellow, blue, and a little green. Well, we're looking for good writers who want to spread the word.

### This List of Forest Animals is Well Beyond Your Expectations

The eagle primarily feeds on mammalian prey like small ungulates, small primates, birds, and lizards.
