Aircraft Maintenance Safety

Tall, heavy aircraft make it hard to see people on the ground when maneuvering in the hangar or maintenance area. Do not smoke around aircraft maintenance areas where chemicals and fuels are flammable.

Aircraft Handbooks & Manuals

Bump caps protect you from an accidental collision with an aircraft part. Properly maintain your tools and follow safety procedures. Safety glasses, a face shield, and goggles protect your face and eyes, depending on the task and materials.

AC 43.13

Evaluate aircraft access areas and job tasks with limited egress and follow confined space procedures if needed.

Aircraft Handbooks & Manuals

Use good ergonomic practices such as frequent 30-second micro-breaks and job task rotation to prevent fatigue and injury. Keep tools away and pick up debris near the engine. .

Aircraft Maintenance Safety

Rushing your work increases aircraft turnaround and accidents. This data generally pertains to minor repairs. Wear adequate ear plugs, muffs, etc.

AC 43.13

Fabrication and repair work requires tools such as welding torches, drills, rivets, or grinders. Keep hair tied back and avoid loose clothing and jewelry to prevent entanglement with moving parts.

AC 43.13

You may need to work in cramped quarters while performing aircraft maintenance. Never enter the ramp or flightline without permission from the air field controller.

Aircraft Maintenance Safety

Well-lit work areas are safer. If an engine starts, you could be severely injured, or small items could be turned into projectiles. The repairs identified in this AC may only be used as a basis for FAA approval for major repairs.
