## Understanding the Long

Most of the misconceptions fell into three categories: Unfamiliarity with the old requirements, misunderstanding of the proposed requirements, or confusion about which facilities must meet the LTC requirements.

## 42 CFR § 484.80

We are retaining the existing requirement at § 483. We proposed to add a new paragraph § 483. Consider how your organization will document what was in place during the emergency and then how to validate the enrolled physicians so they now meet your medical staff policies and procedures.

## Life Safety Code

They became the foundation for improving quality and protecting the health and safety of Medicare and Medicaid beneficiaries. We do not participate in disbursement of public aid funding.

## 42 CFR § 485.642

This rule will also adopt the 2012 edition of the Life Safety Code and eliminate references in our regulations to all earlier editions of the Life Safety Code, and adopt the 2012 edition of the Health Care Facilities Code, with some exceptions. We will consider these comments for future rulemaking. The commenter indicates that the focus of the definition should be placed on a facility's systematic analysis and action rather than only on one-time events.

## 42 CFR § 484.80

The cost of remodeling or installing a bathroom where there is none requires a substantial amount of work in some cases and may cause facilities to decide not to reopen or that the upgrade is not worth the cost.
