**Prince William and Prince Harry sit opposite each other at funeral**

There are now four empty chairs so the next woman has four choices for her chair.

**Seating Arrangement Questions with answer**

It allows for good eye contact and the opportunity to use numerous gestures and to observe the gestures of the other person. Some state dinners have 50 plus guests at their table, so a strict adherence to the seating arrangement rules is a must. Each guest will have a place card assigned to his seat. There is no changing your place cards if you do not like your seat, guests must sit where they are assigned to sit. We will use her as our reference point.

**Body Language**

The first major study in seating positions was conducted by psychologist Robert Sommer from the University of California, who analyzed a cross-section of students and children in public and social situations such as bars and restaurants. Latha sits to the immediate left of Suresh and is at the corner of the bench.

**Seating Arrangement Questions with answer**

In problem 2 again the positions are indistinguishable so seat one of the adults, say the mom, anywhere and then the dad has two choices for his position, either to her left or to her right. .

**Princes William and Harry sit opposite each other at Prince Philip's funeral**

It's the most commonly observed restaurant sitting position on the dating scene, but this is mainly because waiters seat people at tables this way.

**Body Language**

Their study suggests that you are likely to have a 'better side' to your face when you are presenting information to others. The second woman can

choose any of these six chairs, each choice giving a different configuration.
