## Monthly Review

TC Energy Corp is an energy infrastructure company that builds and operates a network of, which transport natural gas from supply basins to local distribution companies, power generation plants, industrial facilities, and other customers.

## Challenges, Uncertainties, and Issues Facing Gas Production From Gas

The objective is to evaluate the performance of these recovery techniques using the experimental and modeling approach.

## Oil & gas

Steel and aluminium are used extensively in the construction industry. It is the strongest link of a weather event to anthropogenic climate change that had been ever found, for now.

## Climate change in the Arctic

A technology involving carbon capture and storage CSS which takes the CO<sub>2</sub> emitted from coal-fired power plants and reinjects it into suitable rock formations underground is actively being evaluated. For other clients that we partner with, gas can appear as a by-product that can aid hydrocarbon extraction or even be captured and profitably sold. Canada's major banks emerged from the financial crisis of 2008-09 among the strongest in the world, owing to the financial sector's tradition of conservative lending practices and strong capitalization.
