Irrigation Engineering: LESSON 6.

Weirs

The crest of a weir or the sill of a sluice is kept at F. What is the well yield?. The degree of turn of the spiral depends on the volume of discharge and the working range required and generally varies from one semi-circle to one and a half complete circles.

Flume Meter

Suggestion: Click on the image above for a pdf version of the drawing that prints better. In an effort to give employees the best data available, and at the same time to keep abreast of new developments in irrigation technology, this guide has been developed with the following major sections: The following documents require or.

RBC broad

Open Flume Outlets : This is a smooth weir with a throat constricted sufficiently long to ensure that the controlling section remains within the parallel throat for all discharges up to the maximum. Establishment of Kirua-Kahe gravity water pipe has affected drainage of all irrigation canals that supplied water to Uporo. Then it acts as a regulator also.

Measuring Angles with a Protractor Worksheets

In Sind, falls and fall regulators were designed using the values shown in Table above, but observations showed that C was much lower, the average value of C for discharges 110 to 280 m³s on the Rohri Canal being about 6 percent lower. FOTG-Section I - Irrigation Guide Irrigation Guide The purpose of this Irrigation Guide is to provide irrigation information to be used by the Natural Resources Conservation Service NRCS employees in both the planning of farm irrigation systems and the planning and application of on-farm irrigation systems and the planning and application of on-farm irrigation water management.

Irrigation Flumes

Moving parts are damaged early.

Measuring Angles with a Protractor Worksheets

At the community level, the authority of traditional leaders has declined hence fail to mobilize the voluntary force deployed for regular canal maintenance.

RBC Flumes

At the sill also a cast iron base is provided. Kilimanjaro , however, cutting of trees can be easily spotted both in the national park and in home gardens. Local communities have accumulated experience about hydrological behavior of the catchment.
