## Intro to focus & directrix (video)

Formally, an ellipse is the locus of points such that the ratio of the distance to the nearer focus to the distance to the nearer directrix equals a constant that ... What do the segments , , , and represent? The ratio is called the eccentricity of the conic. . .

## Intro to focus & directrix (video)

If the distance to the focus is fixed and the directrix is a , so the eccentricity is zero, then the conic is a circle. .

## Finding the Equation of a Parabola Given Focus and Directrix

An example of a parabola you encounter in your everyday life is a satellite dish.

### Directrix

Drag point x, k-p and observe what happens.

### Directrix

The directrix will have the equation.

### Directrix

CONIC SECTIONS Let us place the focus F at the origin and the directrix parallel to the y-axis and d units to the right.

Curves with a directrix .. : Atchison, Clyde Shepherd, 1882

Directrix A is set of all points in a plane which are an equal distance away from a given point and given line.

### **Focus and Directrix in a Quadratic Bézier Curve**

D are connected here with the focus and directrix, and the plane—cone ntersection definition of a curve or. A is the set of points for each of which the product of the distances to two given foci is a constant.
