From basic fundamentals and anatomy to the latest refinements and advances in technique, the book includes comprehensive case analyses to facilitate clinical decision making supplying rhinoplasty surgeons with all the tools needed for achieving superb results. The dynamics of these parameters are best described by four-parameter baseline, maximal, slope, and half-maximal concentration EC50 sigmoid functions. In order to avoid misuse, it is important to understand the limits and caveats of prognostic and predictive models.

But as with health care itself, one size does not fit all, and care systems must be responsive to global reality as well as local demand. A broad spectrum of individuals--from health care providers to researchers to community service providers to business leaders interested in using data to improve their health and the health of their communities--attended these five events.
