## Curriculum

Each PSHE lesson includes an overall learning intention and specific learning outcomes based on knowledge and understanding, skills and the development of attitudes. Whatever the outcome of this work, however, the Secretaries of State consider that local education authorities should ensure that schools and further education colleges co-operate whenever such co-operation will lead to more effective use of resources and improve the curricular opportunities available to pupils. Such a core, it is hoped, would ensure that all pupils, whatever else they do, at least get a sufficient grounding in the knowledge and skills which by common consent should form part of the equipment of the educated adult.

## A framework for the school curriculum (1980)

HM Inspectors' contribution to the debate is published as 'A View of the Curriculum' in their 'Matters for Discussion' series. Local education authorities are already considering the extent to which they should give particular attention to curricular provision for science in the light of the deficiencies to which attention has been drawn by HM Inspectors' primary and secondary surveys. Thus expressed, the idea may appear disarmingly simple: but as soon as it is critically examined a number of supplementary questions arise.

## School Curriculum

With set standards for learning in each subject area and at each grade level, it is important for parents to have information about what their child is expected to know and be able to do.

## Curriculum

Other developments have spread from initiatives taken by individual schools and teachers.
