TRANSCEND MEDIA SERVICE » Prospects, Hope and Strategies for the Future in Palestine

The Israel National Water Carrier opened on 10 June 1964 and has an augmented average annual flow of approximately 420 million cu m through open canals the Jordan and the Netofa canals , tunnels Menashe A and B, Shimron and Eilabun and water reservoirs Tsalmone and Eshkol and a pipeline.

Water In the Middle East: Prospects for Conflict and...

Varying Water Levels in the Middle East, in Cubic Meters Per Capita Water has grown to be a key player in many political conflicts in the Middle East and North Africa. UNICEF, after decades of raising funds from the EU and others, inaugurated the plant in January 2017.

Water politics in the Middle East

Ewan Anderson in Arab Affairs , a quarterly of the League of Arab States, sets out the following on the sources and development of the Jordan River basin. Water in the occupied territories, however limited, is largely the only natural resource Palestinians have.

Water Woes in Palestine

The consequences of this failed attempt had once again the biggest impact on the Palestinian population, especially for those living in Jordan, when Israel built a wall around the West Bank that gave Israel control over the water supply from the Jordan River that corresponded to the Palestinian refugees Gleick, 1993. A recent United Nations report indicates, as will be discussed below in the section on settlements, that the deep wells drilled by the Israeli authorities in the occupied Palestinian territory, mostly for the benefit of Israeli settlers, have affected the level and quantity of water in Palestinian wells, resulting in a reduction of their productive capacity, including the drying up of some of the wells, and the drying up of agricultural land that depended on those wells for irrigation water. A subsequent order, reportedly No.

Are diplomatic tensions sinking prospects of Israel

Meron Benvenisti, indicate that the average natural replenishment of water resources, including surface runoff and some water from the Jordan River, is in the region of 780 million cu m.

Can Palestine and Israel find common ground on environmental issues?

Sarah Shapiro and Gabrielle Hobson In many conflicts in Iraq and Syria over the past three decades, water has played a key role in military actions, and has been used as a weapon through the deliberate targeting of water infrastructure. According to the Jerusalem Post of 24 March 1991, under a Turkish proposal, two pipelines would carry water to eight countries from the Seyhan and Ceyhan Rivers.

Problems and prospects in the political economy of trans

Gaza is one of the , and forcing flocks of people to migrate into that crowded space has taken a toll on the ground and its resources, namely cultivable land.

The importance of water politics in the Israel

International water agreements in Middle East have been rare, but the situation regarding regional water relations in the three main basins will be explored below.
