In a comprehensive review of SBET by travelers, Schlagenhauf<sup>70</sup> points out that presumptive self-treatment is indicated only in emergency situations, and that it must be followed by medical consultation as soon as possible. Possible indications for considering SBET are given in Table 16. Within 2-3 hours ophthalmoplegia may resolve, followed by ataxia within 2-3 days, and finally, cognitive function return to baseline after 2-3 weeks.

## Emergency Medicine Fellowship Program

Hydrocortisone, vitamin C and thiamine for the treatment of severe sepsis and septic shock: A retrospective before-after study. Luckily, the treatment is cheap, effective, and readily available, and rarely produces side effects or adverse reactions.

## Occupational therapy in emergency department

If uterus is not immediately seen, it might be anteverted.

## Occupational therapy in emergency department

Our fellows care for a variety of high acuity medical illnesses and traumatic injuries. Currently, there is insufficient data to support any standard recommendations for prehospital assessment, treatment, transport, and destination.

## Emergency Treatment

Published online 2014 Jul 30. Transvaginal Ultrasound Scanning: Sagittal and Transverse Views Sagitta Technique: Start watching the screen as soon as the probe is past the introitus; the probe does not have to be inserted all the way to the cervix in order to visualize the uterus. Clinical and pathological features of alcohol-related brain damage.

Therapy dogs may help lower emergency clinicians' stress

The first priority is initiation of a basic resuscitation protocol that prioritizes the ABCs airway, breathing, and circulation , assessment, and treatment. Philadelphia, PA: FA Davis; 1989. The teaching module will take users through the setup, technique, and findings in early pregnancy.

## Current Projects

Scan from side to side to visualize entire uterus Tips: The marker dot is pointed towards ceiling.

## Thrombolysis in Acute Ischemic Stroke: Now We Have No Positive RCTs

The OEM Residency is housed in the Department of Emergency Medicine and supported by core and adjunct faculty, the department chair, GME leadership and staff, program coordinators, as well as other institutional support. Thus, when one of the above clinical syndromes is present, treatment is started without lab confirmation. Patients with septic shock who received appropriate antimicrobial therapy within 1 h of recognition had the greatest benefit in mortality.
