Your power source voltage is 24VDC and you are needing to power a 48V PoE device. PoE+ PDs require more power than PoE PSEs can provide.

How to convert 48V PoE to 24V PoE

The device used in this example is the SRX240 or SRX340 Services Gateway, depending on the Junos OS release in the installation. Haunted by the memory of his dead wife, a man's sanity and relationship with his new beloved are ripped apart in this adaptation of Poe's short story. A phantom power technique is used to allow the powered pairs to also carry data.
