Public spaces: More than 'just space'

Today, many of these open spaces can be found in areas that have been abandoned or are incomplete, degraded, or unsafe. Deconstruction Deconstruction is a reverse approach to the stratification strategy of infilling. South Africa, with its history of segregation, needs physical spaces for citizens and communities of different backgrounds to interact.

Landscape-architecture — Mont Evrin Park. The New York City High Line testifies to the reconnection with a city; the Superkilen Park in Copenhagen shows how an urban void can become a meeting place. Enhance the Landscape Public settlements can establish wider connections with the city and the natural environment around them.

10 Extraordinary Urban Regenerative Strategies for Public Open Space

The landscape project can give shape to a new meaning for an old place; it has no connection with the past, but marks the launch of a brighter future.
