Mastering the Machine: Poverty, Aid and Technology

From the beginning of time, technology has been a touchstone of growth and development. The 50-year struggle to harness technology in the fight against global poverty- and why is it taking so long? Never before have so many non-technical people exerted so much influence on the advancement, retardation and direction of technology.

CAB Direct

Ian Smilie has worked at Tufts and Tulane Universities and as a development consultant with many Canadian, American and European organizations. This book analyzes what lies behind the failures and successes of the Appropriate Technology movement.

CAB Direct

The book is about development that gives meaning to people's lives, that is relevant to their resources and needs, and to the hopes they have for their countries and their children. What's new CAB Direct now works with LibKey! Mastering the Machine Revisited is about the connection between poverty, aid and technology. About this book With the use of case studies and previously unpublished material from Africa, Asia, Latin America and the Caribbean, the author demonstrates that the World has learned much about development since the publication of Small is Beautiful and the Brandt Report, but that this knowledge has not been put to great use.
