Federal law may also limit or expand the scenarios in which an adolescent may consent to medical care. Trends in the number of visits and nights in inpatient settings were also examined. Last Revised: May 2019 Unless otherwise specified, NIMH information and publications are in the public domain and available for use free of charge.

Adolescent and Young Adult Health

Practice Tip: Find someone you feel comfortable practicing deep listening with; a friend, colleague, or even teen if you feel comfortable enough to implement this practice in vivo. For many adults who have mental disorders, symptoms were present—but often not recognized or addressed—in childhood and adolescence. Second, we want to make sure that they have had the opportunity to learn to talk with a doctor by themselves so that when they are young adults, they are prepared to communicate and advocate for what they need.

Adolescents with no preventive visit were coded for analyses as not meeting this element. Patients should have autonomy regarding parent or guardian presence during examination, but a parent or guardian should not take the place of a chaperone.

Confidentiality in Adolescent Health Care

§§ The survey item on which this element is based was asked only for adolescents with a preventive visit in the past 12 months. The healthcare professional who is aware of his or her own ethical biases and framework will find it easier to engage adolescents in self-care behaviors and work with families.
