Chapter 6 : Breastfeeding

Neonatal illnesses such as hyperbilirubinemia and hypoglycemia may be due to poor milk transfer and warrant an urgent consultation with a skilled lactation consultant.

Guide to Weaning Your Baby From Breastfeeding

The process works best when done gradually and flexibly, Forsgren says. However, protein fortification may be necessary for smaller or more fragile preterm infants. In 2008, according to the Public Health Agency of Canada, 87% of children were breastfed for some period of time while only 16.

Weaning from the breast
