After learning about the topic you'll receive a quiz to make sure you have a solid conceptual understanding before moving on to the hands-on practice. This way, no matter how you prefer to learn, there's an option for you. What makes these courses different from other online courses? Contextual Practice You've probably experienced it before, you feel like you're learning so much going through a tutorial only to hit a wall once it's time to actually apply that knowledge outside of the context of the tutorial.

ui

Non-Contextual Practice Similar to the non-contextual analysis, context is everything.

ui

Conferences Things conferences are great for - networking, travelling on your company's dime, free swag, finding other companies to join.

ui

For example, you should be comfortable with functions, arguments, loops, control flow, etc. Their courses are made by a wide assortment of third-party contractors and optimized for production quality, not educational value.

ui

All the non-contextual practice in the world is useless if you're not then able to take that knoweldge and apply it towards a contextual production level codebase. Go through Bonus materials, they are GREAT. The first time you're hands-on with a new topic, any extra contextual information you have to process only serves as a distraction.

ui

What level of experience is required for getting the most out of these courses? Non-Contextual Analysis The first time you're introduced to a topic,

any extra contextual information you have to process only serves as a distraction. Our courses are designed to teach you everything you need to know to confidently write production-ready code. .

any extra contextual information you have to process only serves as a distraction. Our courses are designed to teach you everything you need to know to confidently write production-ready code. .
